

California OES Weather Threat Briefing

Sunday, November 1, 2020
9:00 AM PDT

Day 1 (Sunday): Locally elevated fire weather concerns will be seen once again today, particularly across the mountains of southern California where wind gusts to 30 mph and very dry conditions are expected.

National Weather Service
Western Region Headquarters
Regional Operations Center
Salt Lake City, UT

WEATHER KEY POINTS

11/01/20 - 11/07/20

Sunday-Thursday

- Quiet weather will prevail for much of the time, with temperatures remaining above normal for early November
- Elevated fire weather conditions expected each afternoon through Thursday, especially across the Southern California mountains where localized wind gust to 30 mph will combine with ongoing very dry conditions
- Increasing risk for sneaker waves and rip currents along many of the northern California beaches this afternoon through Monday afternoon
 - Sudden larger waves occurring after periods of smaller waves are expected, posing a risk to those on the beach

Friday-Saturday

- A significant change in the weather pattern remains likely by late week and into the weekend. Some highlights include:
 - Some precipitation appears increasingly likely for portions of the state, though the amount and location of precipitation remains uncertain at this time
 - Periods of windy weather are likely at times Friday and into the weekend
 - Much cooler temperatures expected statewide by the weekend
 - Fire weather conditions may become elevated for most of the state during the windiest conditions Friday
